About us

As CFOs are expected to take critical decisions regarding corporate performance and transforming projects, the role of CFO has evolved significantly.

Finance Summit and Awards will ensure you meet like-minded finance professionals who are developing their functions to help drive not only bottom line savings, but also advanced insight and partnering.

Finance summit and Awards will bring together finance professionals for an interactive and insightful one-day discussion on the most pressing topics, including domestic and regional economic outlooks, regulatory risks to be wary of and practical ways of embracing new, exciting technology with an aim to improve operational efficiency.

Learning Outcome

- Discussing the future of finance in the light of analytics and making data lead decisions.
- Understand the possibilities of finance with the introduction of Block chain in India.
- Figure the right financial strategy in a changing policy climate and still be very agile and flexible to change
- Risk kills Returns! Discover a vision of carrying risk together with high returns and the best possibilities.
- Learn how to plan a perfect Merger and Acquisition that can lead to exponential development.
